FA THATCH ROOF CONSTRUCTION

Natural materials. Thoughtful spaces.

Mud House

OUR COMPLETED PROJECTS

Completed work & site progress

Reference images & floor plans

10+ years of experience

Since 2015 | Pondicherry, India

Our Mud House project portfolio: completed photographs, construction progress and related plans across 18 project collections.

Earth. Lime. Natural character.

Traditional ingredients are central to our approach. The material mix and application are specified for each project.

Mud / Earth

Mud and handmade mud blocks for the selected wall system, with compatible earthen finishes.

Lime

Lime-based plaster and finishes where specified for the selected wall and surface.

Sand

Sand in selected mortar and plaster mixes, with grading and proportions matched to the application.

Jaggery

A traditional ingredient used in selected mixes. Preparation and proportions are confirmed for each application.

Kadukkai

Chebulic Myrobalan (Terminalia chebula). A traditional natural ingredient in our selected mixes, with preparation and proportions specified for the application.

Construction method

Materials and details follow the site, approved design and agreed scope.

01 Foundation & plinth

RCC or stone masonry foundations, designed for soil and structural loads, with plinth protection and drainage.

02 Walls & finish

Mud or handmade mud blocks with earthen or lime finishes. Rat-trap bond brickwork is a separately specified option.

03 Roof & ceiling

Metal, bamboo or timber framing as designed. Thatch or tile roofing; bamboo-panel or cement-board ceilings as specified.

04 Flooring & openings

Vitrified tile, clay tile or red oxide floors. Wooden or uPVC doors and windows, as specified.

Confirm floor-plan dimensions and areas before construction.

Rate, lifespan & care

INDICATIVE CONSTRUCTION RATE

₹1,900 - ₹2,200

per sq.ft

Final price depends on site, design, materials and scope.

Indicative lifespan

30 years

Mud / lime / sand walls

5 years

Natural thatch

10 years

Synthetic thatch

15-20 years

Tile roofing

Company planning estimates, not warranties. Actual lifespan depends on installation, weather, exposure and maintenance.

Care & maintenance

Check drainage, roof fixings and visible damage. Repair leaks promptly; maintain wall finishes and roof coverings for their material and exposure.
